

MYOMED 632X

MYOMED 632X = MYOFEEDBACK

Myofeedback involves registering the electrical muscle activity using surface electrodes or cavity electrodes. The Myomed 632X is easy to operate and ensures that the therapist and patient receive feedback on the results. The feedback is provided visually via the LCD-screen that clearly displays the pre-set threshold values and the muscle contractions of the patient. One may also opt for an acoustic signal that indicates whether or not the patient achieves the selected values. The rough EMG-signal is audible via headphones. The therapist does not require any labour-intensive supervision, as the Myomed 632X safely guides the patient through the exercises!

MYOMED 632X = ALSO PRESSURE FEEDBACK

In the case of pressure feedback, the Myomed 632X measures changes in pressure by means of cavity electrodes. These changes in pressure come about as a result of contractions of the pelvic muscles. The therapist and patient receive feedback via the LCD-screen.

MYOMED 632X = ALSO ELECTROTHERAPY

The device offers 2 forms of therapy: electro-stimulation and EMG-feedback. These can be used independently or combined. There are various possibilities regarding the combination of EMG-feedback with electro-stimulation: alternate or triggered by a pre-set threshold value.

The Myomed 632X enables the patient to exercise safely, which efficiently promotes recovery!

V = ALSO VACUUM

The vacuum unit (option) is a suction apparatus that is as quiet as a mouse and that offers the possibility of making use of four vacuum electrodes. The suction power can be adjusted across a broad range and can be set both continuous as well as pulsating. Due to a control system, the pump will only be in operation if the vacuum has decreased to below a certain level.

The vacuum electrodes can be positioned quickly and easily. They adapt to the body surface fully and comfortably. Moreover, you can be sure of adequate contact between the body and the entire surface of the electrode.

MYOMED 632X

MYOMED 632X - MYOCOMBOX

X = ALSO COMMUNICATION

The Myomed 632X allows for wireless transmission of data with the Myocombox (optional). The Myocombox can be combined with any random LCD-screen. A larger screen is often desirable in order to improve the visualisation of the myofeedback. The Myocombox makes it possible to display the measurements on a larger screen. Comfortable, particularly for the partially sighted patient, who can view the results without difficulty. The size of the screen is up to you! As the communication is realised by bluetooth wirelessly, it does not matter where the screen and the Myocombox are positioned.

The Myocombox is also used for data transmission. The results of the measurements are sent to the Myocombox, which then programmes the results on an USB-stick. The data can then be processed by an external PC, in a professional report, for example, or in a statement of expenses programme. The Myocombox will prove to be a welcome assistant for any modern therapist!

- Clear feedback displayed on a large computer screen⁽¹⁾
- Wireless data transfer
- Option to export data for evaluation in other software
- Option to create reports

(1) = The Myocombox package does not include the computer screen

MYOMED 632X, THE MOST COMPLETE DEVICE FOR SAFE TREATMENTS!

- 2-channel EMG-feedback
- 1-channel pressure-feedback
- 3 Different feedback sessions; continuously, work/rest and template
- EMG- or pressure signal graphically reproduced with adjustable sensibility and time scale
- Continuous reproduction of the EMG or pressure value
- Combined application of EMG-feedback with electrotherapy
- Combined application of EMG- with pressure-feedback
- Special cluster for analysis of the EMG and pressure measurements
- Several surface- and cavity electrodes
- Display of feedback on a large screen possible with the Myocombox
- Wide range of display options
- Data transmission, storage and export possible with the Myocombox

3444078	Dummy plug
2 x 3444507	Vacuum lead hose red
2 x 3444508	Vacuum lead hose black
3444505	Sponges Ø 65 mm, set of 4 (for vacuum electrodes Ø 60 mm)
2 x 3444503	Vacuum electrodes Ø 60 mm, 2pcs.

⁽¹⁾ = The Myomed is delivered with 1 set of 8 pcs. adhesive electrodes. The articlenumber 3444222 however represents a box of 10 sets.

TECHNICAL SPECIFICATIONS

EMG-feedback channels:	2, independent
Pressure-feedback:	1
Combination	
EMG/pressure-feedback:	yes (2 channel EMG, 1 channel pressure)
Measurement range EMG:	0,5-10.000 μ V and logarithmically
Measurement range pressure:	0-360 hPa
Current channels:	2, independent, fully galvanically isolated
Current types:	16 current types-36 variants
Programmable positions:	unlimited
Pre-programmed programmes:	>100
Supply voltage:	100-240 V \pm 10% (50/60 Hz)
Dimensions (wxdxh):	39x37x24 cm
Weight:	6.2 kg
